

U.S.-ASEAN ENERGY INFRASTRUCTURE

Symposium and Reverse Trade Mission | December 7-11, 2015

SPONSORED BY: The U.S. Trade and Development Agency

CO-HOSTED BY: The U.S. Department of State

Connecting the United States and Southeast Asia: Building a 21st Century Energy Infrastructure

The U.S. Trade and Development Agency, in collaboration with the U.S. Departments of State, Commerce and Energy, are hosting two unique opportunities to introduce U.S. companies and their technologies, goods and services to leaders from the fastest growing economies in the Southeast Asia region. The **U.S.-ASEAN Energy Infrastructure Symposium and Reverse Trade Mission** will be held between December 7-11, 2015 to foster commercial partnerships in clean power generation and grid modernization projects in Southeast Asia.

The **Symposium, scheduled for December 10-11 in San Francisco, CA**, will highlight country and regional energy infrastructure project opportunities that can benefit from leading U.S. technologies, as well as the regulatory frameworks, standards and financing mechanisms available to support them. Prior to the Symposium, the ASEAN delegates will participate in site visits and meetings with U.S. companies, utilities, regulators and national laboratories in San Francisco, CA and Los Angeles, CA and Denver, CO. The site visits will enable the delegates to observe the design, manufacture, demonstration and operation of U.S. products and services that can help them achieve their energy development goals.

The Symposium and RTM will:

- Highlight current and future ASEAN priority energy projects
- Connect high-level ASEAN decision-makers with U.S. energy sector stakeholders
- Showcase U.S. energy sector technologies and best practices

Participating ASEAN Delegates

The delegation will include representatives from energy ministries, power utilities, generation facilities, national transmission companies and regulators from **Indonesia, Vietnam, Burma, Malaysia, the Philippines and the ASEAN Secretariat**. Importantly, ministers from at least four of the Member States are expected to participate. Other ASEAN Member States (**Brunei, Laos, Thailand, Singapore and Cambodia**) have also been invited to join both the Symposium and reverse trade missions.

Who Should Attend

The Symposium and Reverse Trade Missions are designed to provide U.S. companies' access to foreign decision-makers who are responsible for expanding power generation and strengthening the transmission and distribution systems throughout Southeast Asia. Companies that attend the programs will learn about the projects, priorities and energy initiatives of the fast-growing countries throughout Southeast Asia.

The ASEAN energy sector offers tremendous opportunities for U.S. firms as the region continues to modernize its energy infrastructure and incorporate renewable resources - such as solar, wind and geothermal power - as well as conventional and unconventional gas power generation.

For more information about the Symposium and RTM and to register, please visit www.aseanenergyinfrastructure.twgtrademissions.com or, contact The Webster Group (USTDA's logistical and technical contractor).

U.S. TRADE AND DEVELOPMENT AGENCY

U.S.-ASEAN Energy Infrastructure Symposium and RTM

Reverse Trade Mission, December 7-9, 2015

Track 1: Power Generation

Natural Gas and Renewable Energy Technologies
Denver, CO and San Francisco, CA

Track 2: Smart Grid

Grid Modernization and Balancing Technologies
Los Angeles, CA and San Francisco, CA

Site visits are being selected based on delegate interests. Participation is by invitation only, however sponsorship opportunities are available.

Technical Symposium, December 10-11, 2015 San Francisco, CA | Registration Fee: \$250

This Symposium is bringing together U.S. energy sector stakeholders with project sponsors and prospective partners from Southeast Asia. The program will focus on specific priority energy infrastructure projects that ASEAN Member States are developing and highlight equipment and service needs, proposed implementation method, project development timeframe, and financing requirements. The plenary sessions will cover topics such as financing and investment and feature priority energy infrastructure projects that are advancing toward implementation whether technology decisions are being made. Breakout sessions will highlight country and regional opportunities as well as U.S. technologies and best practices.

The agenda will also include networking events and opportunities for one-on-one meetings between ASEAN energy project sponsors and U.S. industry representatives. U.S. companies should consider sponsoring the event to highlight their expertise and to participate in the Technology Expo (see Sponsorship Opportunities).

These events will focus on opportunities to strengthen the U.S.-ASEAN partnership through cooperation on priority renewable and clean energy, energy security and energy efficiency projects. They will also connect high-level delegates with relevant U.S. public and private sector experts that can support implementation of their energy infrastructure projects.

About USTDA

The U.S. Trade and Development Agency helps companies create U.S. jobs through the export of U.S. goods and services for priority development projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding project planning activities, pilot projects, and reverse trade missions while creating sustainable infrastructure and economic growth in partner countries.
