Shipyards Serving the Offshore Industry

Cemre Shipyard builds and repairs special purpose platform support ships, dry cargo ships, fishing boats and others ships.

Ceksan produces, repairs and converts small and mid sized vessels. They have been in the shipbuilding industry for over 40 years and have built more than 50 vessels from basic barges to sophisticated ferries and chemical tankers in any class and type

DESAN Shipyard's infrastructure is ready and enabled to satisfy the specific needs of any scheduled or emergency repair, in dry-dock or afloat. The shipyard is capable of building commercial, offshore support and supply vessels, fishing vessels, tugboats and mega yachts in its enclosed ship production area. Desan has been in the shipbuilding business since 1974 using state of the art shipbuilding technology. In 1999, Desan was the first shipyard to build an IMO II Chemical Tanker in Turkey. Naval Shipbuilding operations started in 1970.

Gemak Shipyard continues to be a leading ship repair and ship building group in Turkey. Gemak builds and repairs a wide variety of vessels including offshore platforms and vessels, topsides and modules. Gemak Group includes Gemak Shipyard TGE Shipyard, and Neta Steel & Pipe Fabrication Yard and continues to provide dry-docking, ship repair, conversion and new ship building.

Sedef Shipyard builds, repairs and converts ships, in addition to industrial steel construction projects. Sedef Shipyard/Kalkavan originated in 1875.

Tersan Shipyard Inc. is part of the Tersan Group of Companies providing maritime services, including: new ship building; ship repair, docking & conversion; ship owning & operations; and, ship agency services. The group's shipbuilding division has become one of the leading players in Turkey and Europe. Tersan's repair yard is located in in Tuzla, Istanbul and its ship building division is in Yalova.

UCEL Maritime and Trade Co provides design, construction, maintenance, and towage of sea structures. In addition to ships and other vessels, the company also designs and constructs specific orders; such as dry docks and their various accessories, floating concrete structures, slip ways, and other products.

Coastal and Port /Marine Construction Services

Genta provides Industry provides marine construction services and activities including coastal and port construction and related structures construction of hydro (water, roads, ports and marinas, coastal regulations, piers and docks, breakwaters, channels etc. It also prepares port floor and harbor channels, breakwaters, piers, river and canal construction work for water transport traffic with docks and other structures waterways, harbor and river works, coastal regulations, marinas, shelter, construction.

Drilling Rigs and Oilfield Equipment

Petrotek Drilling manufactures standard drilling rigs and oilfield equipment. They specialize in the design, manufacture, repair & maintenance of mobile and land drilling rigs, rig ancillaries (i.e. complete solid control systems, pressure control equipment, camp components), cementing and acidizing units and logging units. Other products include drilling equipment and support fleets. Petrotek Drilling is a subsidiary of BM Holding Inc., a construction, renewable energy generation, geothermal and natural gas exploration and drilling contracting group located in Ankara, Turkey.

Marine Equipment - Steering Systems, Deck Machinery, Suppliers, etc.

Gimas Ship Supply & Services provides general ship supplies, technical & engineering services, and logistics & freight forwarding services. The company offers their clients a wide variety of products covering all kinds of provisions, cabin, deck, engine stores, bonded items, stationery, galley utensils, disposables, nautical publications, spares / machinery, chemicals, maintenance products, laundry services, and customs brokerage. Members of: ISSA & IMPA and a ISSA Quality Certificated Ship Supplier.

Mariner Ship's Equipment designs and produces deck machinery and equipment. All production, controls and testing are completed according to ISO 9001 standards. Their products include: hatch covers and gantry cranes, tween decks & grain bulkhead systems, ro-ro equipment, deck machinery, provision/hose/service cranes, rudder systems and steering gears. Mariner has branches in Jork, Germany and Shanghai, China in serve ship owners in the European and Asian markets.

Data Hydraulic produces steering systems and hydraulic deck machinery systems for the offshore and fishing industries. It also produces tug boat winches, tow pins and towing hooks.
